

R AKASH KUMAR

Bangalore, IN +91 6363699022

LinkedIn—<https://www.linkedin.com/in/akash-shetty-59a2aa327/>

Leet-code: <https://leetcode.com/u/akashrajalbandi/>

Skills

- Programming Languages: **C, C++, Java, Java script**
- Frontend Technologies: **HTML, CSS**
- Other : **Machine learning (Logistic regression, TF-IDF), Raspberry pi, Quantum Computing (Penny lane)**

Education

- RV College of Engineering, Bangalore, IN

BE Computer Science and Engineering

Sep 2023-Sep 2027

GPA-9.43

- **Sir M V PU College, Davangere**

Percentage -96.6

-Schooling in Kakatiya education society Manvi

Projects

Quantum Computing for Atomic Energy State Prediction :

July 2024

- Developed a quantum computing model to predict stable energy states of atoms like hydrogen using the PennyLane library for quantum simulations.
- Employed PennyLane's module to create a quantum device, define ansatz circuits, and compute molecular energy levels.
- Utilized NumPy for numerical operations and array manipulations and Matplotlib to visualize energy convergence results, enhancing insight into quantum state stability.

A Secure Two-Factor Authentication (2FA) System with Flask :

Python , HTML Nov 2024

- Created a 2FA system using Flask and Python, adding an extra security layer with mobile verification and QR code-Based OTP
- Enabled OTP generation and direct delivery to users, enhancing secure access to applications.
- Deployed the 2FA system across multiple websites and cloud platforms, ensuring robust, consistent security.

Fake News Detection Using Machine learning (Logistic Regression)

DEC -2024

- **Developed a Fake News Detection Model** using machine learning (Logistic Regression, TF-IDF) for accurate misinformation identification.
- **Integrated Real-Time API & Dashboard** for scalable, multilingual analysis and interactive visualization of fake news trends.

Societies/Cells

- Coding Club RVCE Member
- Organized and led events to engage students in Coding-related activities and discussions.
- Participated In Some Hackathons
- Currently Working For Open group Enterprise Architecture On Problem Statement called Gov-Build(No-Code Service Builder for Governments)
By -**KOMO INTERNATIONAL** Company

Jan 2024

Sports

- Represented the college in inter-collegiate Zonal and State level Ball Badminton competitions from 1st year
- Helped the team maintain top 4 spots at the State and Zonal Level.
- Actively participated in training sessions, enhancing team performance and fostering a collaborative sports environment

Certifications

In Java Programming

- Completed a Java Programming course through Infosys Springboard, covering foundational to advanced Java concepts.
- Earned certification in [Jan 2024], demonstrating proficiency in Java development skills.

In Building Enterprise Architecture Excellence (BEAE)

- A skill development programme focused on enterprise architecture, covering key concepts and frameworks.
